“transferring the optically generated charges to the carrier pocket while accumulating moveable charges of the same conductivity type as that of the source region over the entire channel region by means of a potential of the gate electrode” and “storing the optically generated charges in the carrier pocket while accumulating movable charges of the same conductivity type as that of the source region over the entire channel region by means of a potential of the gate electrode” as claimed in claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
